

Record of the clinical examination of a stallion

1. Owner : _____

2. Name of Horse : _____ Date of birth : _____

3. UELN : _____ Chip number : _____
 Studbook : _____ PP available : _____

4. Color : _____ Sire : _____ Dam's Sire : _____

5. Prior illnesses/operations none yes Explanation by owner submitted
 Medications in the last 6 weeks _____

6. Vaccine protection, entered yes Influenza Herpes Tetanus
 in equine passport no Other : _____

7. Witness of the examination : _____

Examination

8. Grooming and state of nutrition n.a.f. Peculiarities: _____

9. Skin and scars (e.g. scars from operations, umbilical hernia, etc.) n.a.f. Peculiarities: _____

10. Head, neck, trunk area; back-inspection and palpatory n.a.f. Peculiarities: _____

11. Incisors n.a.f. Peculiarities: _____
 Parrot mouth (less than 50% alignment, with head in normal resting position) no yes

12. Eyes (in a darkened room) n.a.f. Peculiarities: _____

13. Testis consistence right firm-elastic soft
 left firm-elastic soft
 Size right goose egg duck egg chicken egg smaller than chicken egg
 left goose egg duck egg chicken egg smaller than chicken egg

Peculiarities:

14. Prepuce, scrotum n.a.f. Peculiarities: _____

15. Circulatory and respiratory system at rest (incl. auscultation) n.a.f. Peculiarities: _____

16. Spontaneous coughing not present present

UELN

17. Inspection and palpation of limbs FL FR
 HL HR
18. Posture, hoof, shape of hoof n.a.f. Peculiarities: _____
19. Shoeing no front hind
 Peculiarities: _____
- 20a. Examination of walk and trot in hand,
 straight forward, on hard ground n.a.f. Peculiarities: _____
- 20b. Trot in a circle on soft and hard ground n.a.f. Peculiarities: _____
 on both reins
- 20c. Reining back n.a.f. Peculiarities: _____
- 20d. Tight turns n.a.f. Peculiarities: _____
21. Neurological disturbances: Signs of ataxic
 movements, stringhalt, staggers/shivering no yes
22. Examination while exercising
 until intensive breathing occurs n.a.f. Peculiarities: _____
23. Respiratory sound during and
 after exercise no inspiratory expiratory
- 23a. Laryngoscopy with sedation synchronous with complete abduction of the arytenoid cartilage
 (imperative if there is a respiratory sound)
 asynchronous with complete abduction of the arytenoid cartilage Larynx
 (movement of the arytenoid cartilage)
 asynchronous with incomplete abduction of the arytenoid cartilage

Executed or not?

- Other findings: _____
- 2nd laryngoscopy on _____ Findings: _____
24. Auscultation of heart and lungs after work n.a.f. Peculiarities: _____
25. Blood specimens for EVA examination on: _____
26. Further examinations: done result not done
 Re-examination necessary no yes due to: _____

 Date of examination

 Name of veterinarian (block letters)

 Signature, stamp of veterinarian

X-Ray Record

Name horse: _____

Producer and date of the x-rays: _____

Owner: _____

UELN: _____ Pedigree: _____ Color: _____

Oxspring view: dorsopalmar oblique, front left (German: v.l. Oxspring):

Oxspring view: dorsoplantar-palmarodistal projection, front right (German: v.r. Oxspring):

(X-rayed without shoes, with projection of the fetlock joint, including sesamoid bones!)

LF fetlock 90° : _____

RF fetlock 90° : _____
